

ADVANCE FEEDTHROUGH CAPACITORS

Feed through capacitors are used to reduce the unwanted RFI/EMI noise from entering and leaving the equipment. This is done by connecting a low impedance lead-less capacitor to the ground. The feed through capacitors have a center conductor that carries the rated current and a concentrically designed capacitor section that attains an ultimate reduction in lead inductance providing a truly broadband noise suppression.

- * Capacitance 0.1 μ F to 10 μ F
- * Voltage range 63V – 400Vdc , upto 440Vac 400Hz
- * Current ratings 1A to 500A
- * High frequency suppression upto 2GHz
- * Reference standards JSS 50123
- * Temperature range - -55°C to +125°C, -55°C to +85°C
- * Mounting – Bulkhead or Panel
- * Ideal for Telecom and Defence applications
- * Custom design capability
- * Volume scalability

Registered Office and Factory:

Advance Components and Instruments Pvt Ltd

3A-3A/1, Belavadi Industrial Area ,Mysore – 570018 KARNATAKA
